VEDAD DIZDAREVIĆ

DevOps/Cloud Engineer

Frankfurt, Germany | +4915252140062 | vedadd@gmail.com | github.com/lasiurusbat | linkedin.com/in/vedad-dizdarevic-b154305 | sorted.onl

PROFILE

Cloud/DevOps engineer coming from a decade of technical production work in 3D/CGI pipelines. Designed, built and deployed **Sorted** (live at sorted.onl), a multi-tenant SaaS on AWS ECS Fargate, with all infrastructure in Terraform and tag-driven releases through GitHub Actions and OIDC. Holds a DevOps Engineer diploma from DataScientest and further hands-on project experience with Kubernetes (EKS, ArgoCD/GitOps) and GitLab CI/CD. Currently preparing for the AWS Certified Solutions Architect – Associate exam. Brings strong troubleshooting discipline, pipeline thinking and a decade of Agile (Scrum/Kanban) production workflows.

TECHNICAL SKILLS

Cloud (AWS): ECS/Fargate, ECR, RDS, ALB, VPC, IAM (OIDC, least privilege), SES, SNS, S3, KMS, Secrets Manager, CloudWatch, Elastic Beanstalk, EventBridge, EKS
Infrastructure as Code: Terraform (modules, multi-environment, multi-region, S3 remote state, Terraform tests)
Containers & Orchestration: Docker (multi-stage builds), Docker Compose, nginx, Kubernetes (EKS), ArgoCD (GitOps)
CI/CD: GitHub Actions (release tagging, OIDC to AWS, build matrix, manual deploy job), GitLab CI/CD
Languages & Frameworks: Python, FastAPI, SQLAlchemy, Bash, TypeScript, Node.js/Bun, Express, React
Databases: PostgreSQL (RDS, Prisma), MongoDB (NoSQL)
Monitoring & Observability: Prometheus, Grafana, Splunk, Fluent Bit, CloudWatch Logs, Sentry
Version Control: Git, GitHub, GitLab
Methodologies & Tools: Agile (Scrum & Kanban), Jira, Stripe (billing webhooks)
Operating Systems: Linux Administration (certified), WSL2/Ubuntu, Windows

PROJECTS

Sorted — Multi-Tenant SaaS on AWS (ECS Fargate) | Live web-app here: *sorted.onl*

- Built the infrastructure in Terraform as one module with separate dev and prod environments and S3 remote state: VPC with private subnets, ALB, ECS Fargate, RDS PostgreSQL, ECR, Secrets Manager and CloudWatch Logs.
- Hardened prod for availability: Multi-AZ RDS with backups, a NAT gateway per AZ, deletion protection and rolling deployments that start the new task before the old one stops.
- Built a release pipeline: pushing a git tag runs GitHub Actions (typecheck, lint, unit tests), builds both Docker images with OCI labels and version/commit build args, and pushes immutable-tag images to ECR through OIDC with no stored AWS keys. Deploying means setting the image tag and applying Terraform (manual deploy job).
- Added infrastructure CI: *terraform fmt*, *validate*, shellcheck and Terraform tests on every PR.
- Set up email on AWS: SES inbound (receipt rule, KMS-encrypted S3, SNS webhooks) and outbound (configuration set, delivery events), with an ECS task role instead of API keys.
- Containerized the app (multi-stage Dockerfile, nginx + Bun task, Docker Compose locally, migrations on start).
- Application: React, Express, TypeScript, Prisma/PostgreSQL with row-level-security multi-tenancy, Stripe billing, pg-boss jobs, Sentry, guarded OpenAI features; 2,400+ Playwright e2e tests and 3,600+ unit tests.

Ads-Platform — Full-Stack AWS Deployment | *github.com/lasiurusbat/Ads-Platform*

- Containerized a FastAPI/PostgreSQL application with Docker Compose, including networking and healthchecks.
- Deployed a three-tier AWS architecture (ALB → ECS Fargate → RDS) with Terraform: VPC, security groups, IAM execution/task roles.
- Built a GitLab CI/CD pipeline for build, test and deployment; configured Grafana alerting for RDS connections and tuned it to cut false positives.

SRE-Project — Kubernetes GitOps Platform (EKS) | *github.com/lasiurusbat/sre-project*

- Ran a multi-service platform on AWS EKS with ArgoCD for GitOps delivery (Ghost with MySQL), plus Prometheus, Grafana, Splunk and Fluent Bit for observability.
- Fixed an EBS CSI driver IRSA misconfiguration (OIDC provider ID mismatch, stale trust policies) and ArgoCD sync failures (wrong target branches, Bitnami registry migration).

Additional Infrastructure & CI/CD Work | *gitlab.com/lasiurusbat/cars-api*

- Multi-region Terraform project (SNS, S3 backend with native state locking, reusable modules, provider aliasing).
- GitLab pipelines for a Spring Boot app on Elastic Beanstalk (with IAM policies) and a Gatsby site (build, test, deploy, smoke-test).

CERTIFICATIONS & EDUCATION

- **DevOps Engineer Diploma — DataScientest (now Liora), issued July 2024**
- AWS Certified Solutions Architect – Associate — In Progress
- Certifications (DataScientest / Liora, 2024): GitLab · Docker (Docker, Vagrant) · Linux Administration · Python · Bash and Linux · NoSQL Databases (MongoDB)

Bachelor of Fine Arts — Product Design | *Academy of Fine Arts Sarajevo* | *2013–2017*
Languages — Bosnian/Serbian/Croatian (Native), English (Fluent), German (Fluent)

PROFESSIONAL EXPERIENCE — 3D / CGI PRODUCTION

Senior 3D Artist — showroom+ *Jul 2024 – Present*

- Leads 3D environment and asset production within cross-functional pipelines, working in Scrum sprint cycles with Jira-tracked tasks — directly transferable to sprint-based DevOps/engineering workflows.

Senior Unreal Artist — Journee *Jul 2023 – Dec 2023*

- Designed and maintained efficient, reusable meshes, materials, landscapes, and Blueprints, supporting real-time content pipelines — experience directly applicable to build/pipeline optimization and reusable infrastructure module design.

Senior 3D Artist / Cinematic Artist — GritWorld GmbH *Feb 2021 – Jun 2023*

- Produced cinematic sequences using in-house tooling (GritGene) alongside industry-standard DCC software within a Kanban-managed production pipeline, troubleshooting complex multi-tool technical workflows — comparable to integrating multiple tools across a CI/CD or infrastructure stack.

Senior Designer — E.STYLE LMC *Sep 2018 – Mar 2020*

- Delivered hard-surface modeling and design work under production deadlines, managing multiple concurrent deliverables.

3D Artist — FOREO International *May 2018 – Sep 2018*

- Handled end-to-end asset production — modeling, texturing, animation, lighting, rendering, and postproduction — for commercials and product imagery, reflecting ownership across a full technical pipeline.

Earlier: Freelance 3D/2D artist and graphic designer (Sarajevo), producing TV and print advertising for regional clients including BH Telecom and Sarajevo Tobacco Factory, plus architectural visualization work.
